

NAVARA D22

The Navara D22 is on the job, true to its workhorse tradition and with a model to suit your lifestyle. Under the bonnet is a 2.5 litre common-rail turbo diesel with a sporty bonnet scoop. This rugged vehicle really does work hard, equally at home on the building site or working on the land. Whether you choose the rugged DX or the stylish ST-R, its reputation precedes it. With the option of 4x2 or 4x4 and the flexibility of single cab or dual cab, it's muscular and as tough as nails.

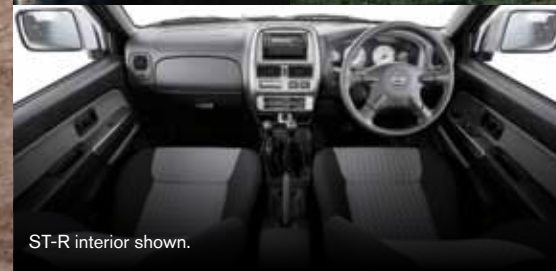

For more information please contact the Nissan Customer Service Centre on 1800 035 035 or visit nissan.com.au

ST-R shown in Brilliant Silver.

DX 4x4 shown in Polar White.

† Note that Single Cab Chassis models do not come with tray.

~ Tare mass = unladen mass of vehicle with 10 litres of fuel, excludes tray body for Cab Chassis vehicles.

** Guide only excludes tray.

∞ Towing capacity is subject to towbar/towball capacity. The capacity may be reduced if a non genuine Nissan towbar is fitted. The permitted download is directly related to the laden mass of vehicle. At the maximum laden mass of the vehicle (Gross Vehicle Mass – GVM), the maximum towball download is 80kgs.

* Indicates metallic colour which is available at extra cost.

¹ Available from June 2009.

Δ Includes optional tray.

Towball download	Loaded vehicle mass	Single Cab	Dual Cab
80kgs	GVM (all models)	GVM	GVM
150kgs	Reduce loaded vehicle mass below GVM by	40kgs	70kgs
200kgs	Reduce loaded vehicle mass below GVM by	110kgs	125kgs
250kgs	Reduce loaded vehicle mass below GVM by	180kgs	170kgs

If the loaded vehicle mass is reduced as shown in the table, the towball download can be increased correspondingly. Accordingly, if the laden mass is 170kgs less than the GVM (Dual Cab models), a towball download of 250kgs is approved. Different trailer types and different trailer manufacturers have varying towball downloads. The customer will need to contact the trailer manufacturer for information as to the download. Nissan is not able to make any recommendation on the use or suitability of load-levelling or weight distribution devices to be fitted to the vehicle. Customers should contact the manufacturers of these devices for further information.
